

THEORETICAL PHYSICS

26 Black Holes, Wormholes and the Secrets of Quantum Spacetime

The phenomenon of entanglement offers new clues to the nature of the cosmos. *By Juan Maldacena*

BIOLOGY

32 Human Organs from Animal Bodies

Growing replacement organs in pigs starts with the embryo. *By Juan Carlos Izpisua Belmonte*

ENERGY

38 The Fusion Underground

A few bold physicists are inventing faster, cheaper ways to make energy like the sun does. *By W. Wayt Gibbs*

KNOWLEDGE

46 5 Things We Know to Be True

Why, then, do we keep forgetting? *By Michael Shermer, Harriet Hall, Ray Pierrehumbert, Paul Offit and Seth Shostak*

EVOLUTION

54 Species in the Making

Why are killer whales splitting into separate species, despite living in close proximity to one another? Cultural differences may be driving populations apart. *By Rüdiger Riesch*

NEUROSCIENCE

62 Get Clean or Die Trying

Hundreds of drug addicts flock to treatment centers that administer ibogaine, an anti-addiction drug that is illegal, dangerous and largely unstudied. *By James Nestor*

LINGUISTICS

70 Language in a New Key

Noam Chomsky revolutionized linguistics by asserting that a toddler has an innate ability to learn a language. Evidence from studies suggests otherwise. *By Paul Ibbotson and Michael Tomasello*

ON THE COVER

If two distant black holes were to become entangled, physicists have realized, they may produce a wormhole bridging two separate regions of spacetime. This connection between entanglement and wormholes could help reveal the quantum nature of spacetime. Illustration by Malcolm Godwin, Moonrunner Design.

4 From the Editor

6 Letters

8 Science Agenda

Donald Trump's science illiteracy. *By the Editors*

9 Forum

Attacking the roots of violence.

By Leana S. Wen and M. Cooper Lloyd

11 Advances

As permafrost thaws, once frozen viruses could become a problem. A bionic pancreas for diabetics. An acoustic prism. The first U.S. offshore wind farm.

23 TechnoFiles

Tech copycats are not good for consumers. *By David Pogue*

24 The Science of Health

E-screens can keep you up at night—don't let them.

By Ferris Jabr

76 Recommended

Competitive Rubik's cube solving. The ethics of primate science. Dyslexia and spying don't mix. Setting the climate agenda for a new century. *By Clara Moskowitz*

77 Skeptic

Why the psychology of politics is always pessimistic.

By Michael Shermer

78 Anti Gravity

A look at deep time at the bottom of the Grand Canyon.

By Steve Mirsky

79 50, 100 & 150 Years Ago

80 Graphic Science

The many ways that big tech innovates. *By Mark Fischetti*

ON THE WEB

Antibiotic Resistance

Scientific American covers the United Nations summit addressing the global threat of superbugs.
